

DEAR VALUED PATIENT,

Our team is dedicated to providing you and your family with the best dental care possible. By offering extraordinary care and services in a comfortable and relaxing environment, and by utilizing the latest advancements in technology, we strive to make your experience here a comfortable, positive and rewarding one. Our emphasis is always focused on total preventive care for our patients so you may achieve lifelong oral health and well being.

In an effort to continue our commitment to you, we are making dental home care products available to you in our office. We are excited to announce our product of choice in supporting your oral health care is Oxyfresh. We are sensitive to the fact that there is a confusing array of possible choices out there. We would not recommend just any product line. We are very clear about the vast difference in the quality, safety and efficacy in oral care products and take this step seriously. We have researched these products carefully. Oxyfresh products are clinically tested and we are confident they are the safest, most effective products available. Additionally, this home care system fully supports and protects all the restorative, cosmetic and hygiene services we provide.

HERE IS WHAT IS AVAILABLE TO YOU:

TOOTHPASTES — There are three super-concentrated toothpastes, each uniquely formulated to customize to our patients' individual needs. They contain no saccharin, no dyes and no harsh abrasives. They are safe for the entire family, completely eliminate bad breath at its source, and leave your mouth feeling fresh and clean without any residue.

TONGUE CLEANERS — There are two tongue cleaners to support you in achieving a cleaner, healthier mouth and longer-lasting fresh breath. These are more effective than a toothbrush in completely removing the disease- and odor-causing bacteria that gets trapped on the surface of the tongue.

MOUTHRINSES — These Mouthrinses are clear, which means they do not contain any harmful dyes or colorings that can stain your teeth or dental work. Also, they are carefully balanced within a neutral pH range to protect your enamel and maintain a safe environment for the tissues in your mouth. There is no alcohol or strong flavor that only mask odors. Instead, Oxyfresh Mouthrinses contain a unique and powerful ingredient that eliminates harmful disease- and odor-causing bacteria at its source. These rinses safely and effectively leave your mouth completely fresh and clean, without the burn!

HYDROMAGNETIC IRRIGATOR — This is no ordinary irrigator! The OxyCare™ 3000 utilizes hydromagnetic technology, which is scientifically proven to keep stains and build-up from sticking to your teeth. This comes with four color-coded tips, making it fun and easy for the entire family. This is a must for anyone who doesn't floss regularly, has braces and those who simply love the cleanest mouth possible.

DENTAL GELS — These gels are uniquely formulated with aloe vera and provide the ultimate deodorizing and soothing relief for irritation, burns, wounds, and oral discomfort.

Ask any one of our team members about any of the Oxyfresh products ... we all personally use and love these products and we are confident you will, too!
